# ***WELCOME TO THE WORLD OF LOCKPICKING!***

Aye Aye pirates

Lockpicking is the art of opening locks without keys by using simple tools like hook picks and tension wrenches.

A basic lock has pins that need to be aligned just right to unlock it, With practice, patience, and respect for the craft, anyone can learn to pick basic locks. so lets get started..

**LISTEN HERE,  
MORONS!**

**BASIC LOCKPICKING TOOLS!**

**RAKE**

**HOOK PICK**

**TENSION WRENCH**

WHERE'S THE  
HOOKER??

I SAID HOOK  
YOU DUMBASS

4-PIN  
COMB

5-PIN  
COMB

6-PIN  
COMB

# HOW LOCKS WORKS

SHARP  
LOCK

PLUG

Shackle

Latch

Plug

Springs

Pins

INSIDE EVERY LOCK, THERE'S A SET OF PINS AND SPRINGS DESIGNED TO KEEP THINGS SECURE. WHEN WE INSERT THE RIGHT KEY, IT ALIGNS THESE PINS PERFECTLY, LETTING THE LOCK TURN OPEN. WITHOUT THE KEY, THE PINS BLOCK ANY MOVEMENT—SO THAT'S WHERE OUR PICKS AND TOOLS COME IN TO "PERSUADE" THE PINS INTO PLACE.

# TECHNIQUES FOR SUCCESSFUL LOCKPICKING

The Eendre Treasure Box Practice Lock

## STEP 1

Insert a tension tool into the lock's keyway and apply gentle pressure. This creates a small gap at the shear line, essential for picking.

## STEP 3

**Set Each Pin:**  
– One by one, lift each binding pin to the shear line until you hear or feel a slight click. This means the pin is set.

## STEP 2

Insert your pick into the lock and gently feel for the pin that offers the most resistance, as this is the binding pin. Lightly lift it until it starts to give

Keep steady tension while setting each pin. Once all pins are set, the plug should rotate, and voila the lock will open!
